SUMMARY

Software Engineer with experience building and maintaining scalable server side applications for web platforms using Node.js, NestJS, Python, Django, and FastAPI. Accomplished delivery of reliable backend features for payroll, HR, ecommerce, microservices and multitenant systems, measured by successful feature launches and improved system usability, by designing RESTful APIs, integrating SQL/ NoSQL databases, and collaborating with cross functional teams in agile environments. Strong foundation in Git, backend security, performance optimization, and writing reusable, testable, and efficient code.

LANGUAGES AND TECHNOLOGIES

Node.js, NestJS, Python, Django, FastAPI, JavaScript, TypeScript, React, Next.js, Vue.js, PostgreSQL, MongoDB, SQL, NoSQL, Docker, AWS, Git RabbitMQ, RESTful APIs, backend security, testing, agile development

WORK EXPERIENCE

paismo 🌐, Backend Engineer

Mar 2024 – May 2026 | Los Angeles, United States

- Accomplished faster employee onboarding workflows, measured by successful processing of multiple document types, by building backend features in Node.js and NestJS for document upload, parsing, and structured data extraction.
- Accomplished more reliable user data processing, measured by improved extraction accuracy for names, emails, work history, and education fields, by integrating FastAPI, Tesseract, and spaCy into backend document pipelines.
- Accomplished secure and scalable payroll operations, measured by successful employer to employee disbursement flows, by designing and maintaining backend payment integrations with NestJS, RabbitMQ, and external APIs.
- Accomplished smoother product delivery across teams, measured by on time rollout of timesheets, leave management, and employee performance features, by collaborating with front end developers, participating in code reviews, and working in an agile development process.
- Accomplished maintainable backend systems, measured by easier feature extension and debugging, by writing reusable, testable, and efficient code with attention to performance, security, and data protection.

Oneco 🌐, Backend Developer (Part-time)

Sep 2023 – Apr 2024 | Florida, United States

- Built and maintained Django backend services with Stripe integration to deliver production ready payment functionality.
- Improved deployment consistency by supporting Docker adoption and standardizing backend workflows.
- Redesigned backend components and APIs to help scale the product from a monolithic system to a multi-tenant architecture.
- Documented APIs, used Git, and collaborated with frontend developers to improve feature delivery across teams.

Prophecious Technologies, Full-Stack Developer

Jul 2023 – Feb 2024 | India - remote

Reserve Xp 🌐

- Led the development of multi tenancy SaaS booking system with multi-database and multi domain architecture, using React Node.js.

FLC 🌐

- Contributed as a fullstack developer, using and Next.js and Django to revolutionize consumer engagement and experiential marketing.
- Integrated Strapi CMS and and Next.js seamlessly, empowering businesses with effortless content management.
- Enabled real-time updates and Ensured data security and reliability through robust measures, maintaining optimal user experience.

Mr Mechanics 🌐

- Designed and implemented to revolutionize the home maintenance and repair industry with features for both user and handyman, enabling seamless appointment scheduling, realtime notifications, facilitated direct communication and secure payments. contributed to the development of an admin portal.

Mozivol Ecommerce 🌐 : Contributed significantly to the full-stack development of Mozivol Ecommerce, an innovative ecommerce website..

Supertrainer 🌐

- SaaS Learning Management for Trainers where trainers can purchase memberships and instruct users through personalized video sessions using their own domain names.

EthioDamic, Full-Stack Developer

Jan 2021 – Dec 2023 | Addis Ababa, Ethiopia

Crash Gebiya 🌐 : Developed a web and mobile inventory management system for a shoe sales company using vue.js, Flutter, and Django.

Vendor Management System: Played an active role in the development of the System with centralized vendor records and real time tracking.

RDX Delta rabbit, Full-Stack Developer

Dec 2021 – May 2023 | Addis Ababa, Ethiopia

Education Portal and No Stock portal, an eCommerce platform

- Implemented innovative and responsive design solutions Utilizing and Next js, React, focusing on intuitive interfaces.

Across Express, Software Engineer

May 2020 – Nov 2021 | Addis Ababa, Ethiopia

Across Express Portal 🌐

- Contributed to constructing a digital freight logistics platform featuring Real-Time Tracking, Bidding, Quoting with full ERP system.
- Collaborated closely with cross-functional teams to ensure seamless integration and functionality. and to connect shippers with carriers and agents streamlining utilizing using ERP Next, Frappe, python and React.

Ethiopia Commodity Exchange (ECX) portal

- Enriched data visualization, incorporating charts for daily exchange data and bid form trends using Django, python and React.

PROJECTS

(Hackathon Project) Gagarian Project, Full-stack Developer

- During the ICOG Hackathon, my team and I built a local food e-commerce site using React and Django.
- As a Full-stack developer, I ensured an engaging user interface and the logic of the site, contributing to our second-place finish.

EDUCATION

Addis Ababa University, Bachelor of Computer Science

2019 – 2023

CERTIFICATES

Secured 2nd place at the iCog Makers Hackathon — Successfully completed training and secured 2nd place in the MSD 101 Hackathon.
